Our Mission - To create desirable rural experiences

Demolition Materials

What are acceptable demolition materials?

Acceptable materials include but are not limited to wood, concrete, siding, shingles, drywall, insulation, glass, and ceramic materials.

What are not acceptable demolition materials?

- Any type of hazardous materials.
- Asbestos – Materials containing asbestos are not accepted at the County Transfer Stations.
- Recyclable Materials e.g.: metal, tires, paint etc.
- Household Waste

How do I know if I have any hazardous materials or Asbestos in my Demolition project?

A reputable building inspector can inspect your demolition project and confirm whether you have any hazardous materials or asbestos present.

Will I need to prove that I do not have any Asbestos or Hazardous material in my demolition material before I take it to the Transfer Station?

Yes. There are some steps that need to be taken before the demolition project takes place:

- 1) A Building Demolition Permit must be filled out and given to the planning and development department as well as to the Waste Department for approval. This permit is available on the County of St. Paul website under 'Waste Management/Waste Material.'
- 2) Along with the Permit, there is a form (attached to the Permit) that must be signed which clears the demolition project of having any hazardous material or Asbestos. This form along with the building inspector's report must accompany the Demolition Permit if the material is being taken to the County of St. Paul Transfer Stations. Evergreen Landfill will require these forms if the material is being taken to their site.

Is there any cost to bring this material to the transfer station?

Yes. The charges are as below. By sorting your materials accordingly, you can save money on your demolition project. The transfer station attendant will accept cash, cheque or fill out a form so that you can be invoiced by the County of St. Paul office.

Changes to County of St. Paul Fee Schedule Bylaw 2024-07 Effective March 26, 2024

Solid Waste Disposal

Concrete/Shingles/General Demolition	\$55 - 1/2 - 3/4 Ton Truck Bed \$75 - 1 ton Truck Bed & Single Axle Trailer \$150 - Double Axle Trailer or Larger \$250 - 10 Yards \$300 - 20 Yards \$300 - Roll offs
Mixed Loads:	\$110 - 1/2 - 3/4 Ton \$150 - 1 ton \$300 - Dump Trailers \$500 - 10 Yards \$600 - 20 Yards \$600 - Roll Offs
RV Unit Demolition	\$100 - Under 20' Hitch to Bumper \$200 - Over 20' Hitch to Bumper
Non-transferable Materials	Cost Recovery
Freon Removal	\$20

Can all the wood I bring to the Transfer Station be burnt?

Wood that has stain, paint, or any type of wood preservatives cannot be burnt. Demolition charges may apply to these materials as they will go into a class 3 landfill.

Clean wood that has no stain, paint, or any type of wood preservatives can be burnt at no charge to the customer. These materials must come sorted to avoid fees.

Which County of St. Paul locations take Demolition materials?

Ashmont and Mallaig both have Class 3 pits which can accommodate larger amounts of material.

St. Lina, Vincent Lake, St. Edouard, and Whitney Lake only have roll off bins and cannot accept large amounts of demolition material. Only a minimal amount of demolition material is allowed at these sites.

Can all these materials be dumped in the same spot at the transfer stations?

Shingles must be kept separate from other demolition materials.

Any recyclable materials must not be dumped in the same place as the demolition materials. Scrap metal, appliances, electronics, cans of paint, light fixtures with ballasts, light bulbs and any household hazardous waste must be kept separate and sorted accordingly.
